

Why EVault SaaS for Law Firms?

Key Benefits

- Central control
- Complete simplicity
- Immediate recovery
- Secure and compliant
- Cost-effective

“This online service is really invaluable to us. Our entire DR plan is based on EVault, and the recommendations its team provides.”

—Johnston Smith
IT Director
King LeBlanc & Bland

EVault® data protection is trusted by hundreds of law firms globally. Since 1997, we’ve delivered complete solutions based on world-class EVault technology that are easy to use, scalable, and customized to suit your needs.

Secure Technology and Infrastructure

Your data is completely safe with EVault SaaS (Software-as-a-Service) online solution. We back it up to one of our secure, Tier III or IV data centers. There are no tapes or physical transport involved—EVault’s online, disk-to-disk backup eliminates unreliability and human error. Your backups are fast, so you don’t spend unnecessary time waiting to restore data. EVault’s infrastructure and patented technology gives you peace of mind.

Easy to Use

EVault SaaS automatically backs up your entire firm’s data from your central office, remote locations, and even laptops. There’s no need for additional IT resources—anyone on your staff can easily manage backups and data recovery. Our web-based CentralControl tool makes it easy to monitor and manage backups from anywhere with web access. You also get support from EVault’s experts, at no additional cost—24/7 for critical issues.

Certified, Regulatory-Compliant Security and Privacy

EVault SaaS makes it easy to comply with regulatory requirements, including Sarbanes-Oxley. The 256-bit AES encryption, an approved Federal Information Processing Standard, shields data in transit and in storage, and there’s no “back door” to let anyone view protected information, not even EVault.

Custom-Made For Your Firm

Your backup solution fits your firm perfectly, because we offer the industry’s widest range of support for operating systems and applications. EVault SaaS comprehensively integrates your existing components—there are no time-consuming sidetracks such as mandatory restores of entire Exchange databases just to retrieve a single email message. Everything just works, without hassles. And we guarantee your satisfaction—your EVault SaaS implementation includes a 30-day, money-back guarantee.
