

Managed Compliance Solution for Your Business

The growth of digital data and ever-more-stringent regulations governing its security and retention make it mandatory for securities brokers and dealers to have reliable data protection, email retention, and business continuity plans. **The EVault Compliance Bundle gives you an easy way to satisfy both regulatory requirements and your internal policies for data privacy, security, accessibility, and retention.**

EVault's Compliance Bundle combines automatic online backup at a secure offsite data center, compliant email archiving, and a separate repository for secure storage of your business continuity documents. **You get all three at a reduced bundle price: 20% off.**

Key Benefits

- Regulatory compliance
- Secure data protection
- Easy-to-use management interface
- No capital investment
- Reduced bundle pricing

Product	Function	Benefit
EVault Protect™	Automated, secure online backup and recovery service.	Fast, easy data protection. No tapes or manual processes. End-to-end encryption.
EVault ProMail™	Compliant email and Instant Message archiving service captures and monitors all messages and attachments.	Satisfies SEC/NASD/NYSE regulations. Easy-to-use web-based interface. No software to install.
Our EVaultSM	Online data repository for secure storage of critical business continuity plans.	Secure, collaborative access to company documents. Satisfies NASD Rule 3510.

Feature	Benefit
Regulatory compliance	Ensures that your organization meets all SEC, NASD, and NYSE requirements including SEC Rules 17a-4, 204-2, 31a-2, NASD Rules 3010/3110, NYSE Rules 342 and 440 for email archiving, retrieval, and surveillance.
Email and IM archiving	Lets compliance officers quickly locate, track and provide the required emails and attachments for auditing purposes.
Secure data protection	EVault's DeltaPro™ technology speeds backup operations and dramatically reduces storage costs. All backup data is encrypted during transmission and in storage, assuring privacy and security.
Business continuity repository	OurEVault provides a secure, easy-to-use online workspace for storing business continuity-related documents. NASD Rule 3510 requires firms to maintain a business continuity plan.
Assured integrity of stored data	Archives reside in a secure offsite data center that ensures all data, email, attachments, and business continuity plans are unaltered from their original state.
Reduced pricing	The EVault Compliance Bundle is offered at 20% off the price of purchasing the services separately.
