

**EVault's strong partnership with Microsoft ensures reliable backup for mission-critical data**

If your business depends on Microsoft for its mission-critical applications, you need a partner you can trust to protect your digital assets. Your business continuity and productivity depend on this. But there are few data protection solutions engineered and certified to protect Microsoft environments with minimal effort and without additional resources. EVault is the *one* company that assures compatibility and interoperability when protecting data in Microsoft environments.

As the trusted expert in complete data protection solutions, EVault has supported Microsoft's applications since our company's inception in 1997. All EVault products run on the Windows platform, with the added benefit of granular support for Microsoft Clusters, SQL, and Exchange through our application plug-ins.

An ongoing Microsoft Gold Certified partner, EVault delivers proven expertise with Microsoft technologies, and proven ability to meet customers' needs. In addition to maintaining Gold Certified status, both the EVault Protect backup and recovery Software as a Service (SaaS), and the EVault InfoStage software agent received the "Certified for Windows" classification for Microsoft Windows Server 2003 Standard and Enterprise Editions. The Certified for Windows status required stringent functional, technical, and environmental testing, establishing EVault's compatibility and interoperability with Microsoft Windows Server 2003 operating systems.

EVault also has earned Microsoft's certification of competency in:

- ISV/Software Solutions
- Networking Infrastructure Solutions
- Advanced Infrastructure Solutions

Our strong partnership with Microsoft confirms our commitment to customers who rely on Microsoft to run their business critical applications.

**Customer Benefits**

<b>Manageability</b>	EVault simplifies your organization's ability to manage its data protection environment. You easily manage your environment from a web console anywhere, anytime.
<b>Compatibility</b>	Microsoft certification validates EVault's seamless integration with your most important platform and applications.
<b>Reliability</b>	Using reliable and efficient disk-to-disk technology, EVault protects your Microsoft environment without compromising system performance.
<b>Interoperability</b>	EVault's native application support ensures business critical applications and server are protected.
<b>Security</b>	EVault Protect complies with all Microsoft security requirements. You can rest assured that your data is safe with EVault.

**Why EVault:**

EVault's data protection solutions provide reliable online, disk-to-disk backup and recovery solutions to over 9000 businesses. EVault's solutions are flexible to meet any company's business and regulatory requirements while supporting their growing data needs. Our advanced, patented technology effectively minimizes the amount the data footprint without disrupting normal business operations.
